TRANSITION WOW: SWITCH TO AN ELECTRIC LIGHT TRUCK

Transition Wow is a program whose mission is to facilitate and accelerate the energy transition of delivery vehicles in order to contribute to the reduction of greenhouse gas (GHG) emissions from the transportation sector. It's a profitable investment that's good for the environment and generates financial savings. For the initial stages of the project, the service is aimed at fleet managers in the Greater Montreal area.

A personalized turnkey service

- > Assistance to convert to electric your own vehicle or a second-hand vehicle.
Option to add a refrigerated box.
- > Assistance for the acquisition of a new 100% electric delivery van or truck (availability of electric cargo vans and pickups planned for 2021).
- > Loan of a replacement vehicle for the time of the conversion.
- > Advice and training in the use of the electric vehicle.
- > Management of grant applications, vehicle registrations, and insurance policies.
- > Advice and support for the acquisition and installation of an electric vehicle charging station where appropriate.
- > Performance monitoring and calculation of GHG emission reductions.

Technical characteristics of the conversion

Become a pioneer in energy transition: get ahead of the inevitable transition to electric delivery vehicles by taking advantage of innovative technology.

210 km range
on a full charge

Intelligent 2-speed
automatic transmission

Engine life of
1 million km

80% recharge in 1 hour
on a level 3 terminal

Savings of 50% in
maintenance costs

9 tonnes of GHGs
eliminated per year

Société de l'assurance
automobile
Québec

Vehicle
SAAQ approved

BUDGET ESTIMATION

The investment to convert a delivery vehicle to electric and to install a charging station starts around \$43 000* including service charges and subsidies.

*As the market is nascent and dynamic, the costs and the amounts of government subsidies can change rapidly. Contact us for the most up-to-date information that corresponds to your situation.

⊕ Advantages

Drive clean

> Reduce your GHG emissions (approximately 9 tonnes of GHGs eliminated per year)¹.

Save money

> Save approximately \$4000 in fuel² and reduce your maintenance costs by 50% per year³.

Simplify your energy transition

> Benefit from comprehensive and personalized support including assistance to apply for government grants, to register the vehicle, and getting insurance.

Take advantage of specialized assistance

> Benefit from the guarantee and the maintenance of the vehicles ensured by specialists.

Communicate your environmental involvement

> Easily download and share your GHG reduction report from our [website](#).

¹ Based on 20,000 km per year, 19 litres/100 km, according to data from Environment and Climate Change Canada.

² Calculations based on \$0.07 per kWh, 20,000 km travelled per year, with a fuel consumption of 19 litres/100 km and a gas price of \$1.20 per litre.

1st 100% electric refrigerated delivery van converted in Canada

An innovative technology from Quebec

Transition Wow after-sales service converted truck

WARRANTIES AND TECHNOLOGY

- > Convertible models: delivery vans and trucks such as cargo vans, SUVs, and pick-ups (Class 2, 2A, 3 and 4)
- > Engine technology that is reusable and reinstallable in other similar vehicles
- > All original equipment and safety devices remain functional after conversion
- > Complete recharge in 3 to 6 hours on level 2 terminal and 80% recharge in 1 hour on level 3 terminal (DC charging station)
- > Basic warranty: 5 years or 100 000 km

Earth Day Canada's Transition Wow program was made possible thanks to the financial support of the Government of Québec.
